

The BA488CF Fieldbus Display is an intrinsically safe instrument that can display up to eight fieldbus process variables. Nine selectable standard screen formats contain one, two, three or four variables, with units of measurement, tag descriptions and bargraphs on some screens. The use of standard screens simplifies commissioning, but if required dedicated screens tailored to an individual application can be constructed.

Fieldbus Foundation and Profibus PA versions of the BA488CF are available and have been registered by both organisations. The Fieldbus Foundation version now has selectable function blocks allowing use with most popular system hosts. Configuration files may be downloaded from the appropriate Fieldbus Foundation or Profibus sites, or from www.beka.co.uk.

Powered by the fieldbus the BA488CF only requires a 2-wire connection, no additional power supply Zener barriers or galvanic isolators are required. The high contrast 86 x 45mm liquid crystal display incorporates a green backlight that is also powered from the fieldbus enabling the display to be read in all lighting conditions from full sunlight to total darkness.

Simple commissioning results from the use of standard display formats. Apart from loading the BA488CF configuration files onto the system host and selecting the fieldbus variables to be displayed, no programming is required. Configuration of the BA488CF Fieldbus Display is performed via the fieldbus and the instrument front panel push buttons.

ATEX, FM & IECEx intrinsic safety certification allows the BA488CF to be installed in gas hazardous areas worldwide. The two fieldbus terminals comply with the Fieldbus Intrinsic Safety Concept (FISCO) simplifying system design and documentation, although connection to non-FISCO intrinsically safe segments is possible using the entity concept. This allows a BA488CF to be directly connected to almost any hazardous

fieldbus providing the segment can supply the 25mA consumed by the display.

Six optional alarm outputs may be linked to any of the displayed variables. Each isolated single pole solid state output may be conditioned as a combined high and low alarm, or as just a high or low alarm. All the outputs comply with the requirements for simple apparatus, which permits them to switch any certified intrinsically safe load such as an intrinsically safe sounder, lamp or solenoid valve.

Custom display screens dedicated to a specific application may be created by writing to the transducer block parameters. Custom designed displays can contain text in five

different font sizes plus lines, boxes, bargraphs, simple graphics and fieldbus process variables. Free programming utilities to Typical custom display assist with screen

development are available via the BEKA web

The six push buttons on the front of the instrument may be used for returning operator acknowledgments or controls by reading a transducer block parameter. If larger industrial switches are required for these acknowledgements, up to six external push buttons may be connected to the BA488CF. When the external switches are activated, the front panel push buttons may be disabled or operated in parallel with the external switches.

Comprehensive documentation includes Fieldbus Foundation and Profibus Interface Guides and a Programming Guide that explains how to create custom display screens.

For field mounting applications see the BA484DF datasheet. This instrument has a similar electrical specification but is housed in a robust IP66 GRP enclosure suitable for external mounting.

BA488CF

Fieldbus display

Intrinsically safe for use in all gas hazardous areas

- Fieldbus Foundation & Profibus PA models
- Compatible with most system hosts
- High contrast display with backlight
- Displays up to 8 fieldbus variables
- Intrinsically safe ATEX, FM & IECEx certification FISCO compliant
- Six operator push buttons & six optional alarm outputs
- IP66 front panel
- 3 year guarantee

BEKA associates Ltd. Old Charlton Rd. Hitchin, Hertfordshire, SG5 2DA, U.K. Tel. (01462) 438301 Fax (01462) 453971 e-mail sales@beka.co.uk www.beka.co.uk
